series

pearl

the epitome of awesome clean design. pearl interprets modern lines and is open in its uniformity. the key to the pearl is its classic form, it allows for leaning back and resting and with its warm embrace the haptic feedback is clearly perceptible.

pearl can be the center piece of a coordinated suite of bathroom furniture, all solid surface including bidet, toilet and washbasins, both freestanding and countertop.

shine

‘as we let our light shine we unconsciously give other people permission to do the same. as we are liberated from our own fear, our presence actually liberates others’. (marianne williamson)

inspirational words that embody the philosophy behind the exceptional series shine, which comes alive through subtle led illumination.

create a very special ambiance right in your own home with this unforgettable collection all capable of being individually illuminated.

feel

some say the unique feel series is peter jamieson's finest work, its classic angular formation gives flexible but highly stylish solutions to multitudinous bathroom conundrums.

conceived in the principality of monaco this is european style at its best attracting interest from around the world. the embodiment of no nonsense bathing, enjoy!

be sure to consider the complete suite for maximum effect and lasting impression.

glam

reside royally and bath first class! this luxury modern design series leaves no wish unfulfilled. created with pure lines it conveys the character of natural elements glamorously implemented in your bathroom. formations of classic rectangular shapes interacting with dished finishes are setting a statement.

impress yourself every day in adding luxury trends and highlights to your home.

designed by peter jamieson

peter jamieson was born in england in march 1969 and studied at brighton school of architecture and design, graduating in 1991 with a bachelor of arts honors degree. he completed his first built solo project, 'hucclecote house' at the age of 25. upon completion, he moved to milan and worked in the studio of antonio citterio for 3 years.

amongst other projects, he worked on the showroom towers for 'smart' cars. then, returning to private practice, he moved to saint tropez after milan and designed a number of villas and apartments along the french riviera. he moved to monte carlo in 2000 and opened his own studio here in 2002 to focus on industrial design, furniture projects and creative direction. he lives and works from monte carlo. a growing client list, includes boffi. ideal standard tubes radiatori, deltacolor, and ritmonio.

his work has been selected for 'young and design'. the montecarlo radiators for tubes radiatori have been selected to represent the 100 best pieces of italian design for i-dot. and the 'waterblade' taps for ritmonio were chosen for the 2005 'good design' award from the chicago athenaeum museum of architecture & design.

k|stone® is a high quality composite 'solid surface' material developed by knief & co., the leading german bathroom equipment manufacturer. by its chemical composition, k|stone® is a natural mineral aluminum tri-hydrate powder mixed with acrylic-modified polyester resin. the addition of different natural pigments allows this material to be available in numerous colours and effects. resistance to all sorts of chemical and physical influences, as well as its completely impermeable surface make k|stone® the first choice for interiors when hygiene and neat design matter the most. the material has many advantages:

- waterproof: corrosion or swelling due to steam or moisture is not possible. the surface cannot be damaged by moisture, rot or mildew and liquids cannot penetrate it.
- 100% durable due to impact and shock resistance
- 100% hygienic, dirt repellent and stain resistant due to non-porous surface
- chemical resistant
- completely homogenous
- thermoformable
- pleasant to the touch
- easy to repair and care
- lame and heat resistant (for a short time over 200 °c)

by using different grinding media with different grain sizes the gloss level of the surfaces can be adapted to your desired degree. despite its resistance, k|stone® is easy to mill, cut, drill or grind. like this, individual lettering or logos can be milled into the material. besides acrylic, k|stone® is perfect for combination with other materials. whether it is glass, wood, plexiglass or non-ferrous metals the diversity is huge.

k|stone® is not only applicable in the sanitary sector. also kitchens, laboratories, shops or other design projects provide a perfect space for application. there are numerous possibilities, let your imagination run wild. k|stone® is pure quality, 100% made in europe.
